

# Precast Erectors Planner (PEP) App

Erection plan changes can cost as much as \$4,000+ per hour and snowball from there.

Improve your profits by synchronizing your entire Field Team. This App provides a real time view of all the Field Activity and project reporting which enables office and management to schedule labor, equipment and materials just in time. No more wasting human resources and expensive equipment. No more waiting doing nothing. Precast Erectors Planner synchronizes the entire field team for maximum efficiency.

Project report

Erection sequence

## The main Features

Load erection sequence from Excel

Automatically fills out a 4 day look ahead with delivery dates and delivery times

Automatically calculate the number of pieces that are erected on any given day

Team members are instantly notified about schedule changes

Daily and Anytime Status reports

Unlimited photos

Works on all Apple Devices

Deploys in under 1 hour

## Business Benefits

- Know right away when the schedule slips and avoid wasted time and money on labor, equipment and materials
- Keeps all the team members on the “same page”
- Helps Precast Erection Foreman to coordinate his work and quickly turn in daily reports on time
- Keeps dispatch department and loading departments informed, so they can see how many loads they will need for the next few days
- Helps coordinate project needs for Project managers and Contractors
- Pays for it self on your first project!
- Get daily and project reports to save money and time
